To whomsoever it may concern

Mr. Sailesh Nanisetty has done his internship in my lab during summer 2020. He worked in the broad area of predictive process mining. During this period he did three activities: 1)created a tool for automatically labeling process data using Linear Temporal Logic; 2)applied Gaussian mixture model for clustering unlabeled data, and 3) used decision tree and random forest to classify the processes into normal and abnormal category. He worked closely with one of my research scholar. We find Sailesh to be an enthusiastic and sincere person. We wish him a very bright future.

Sincerely

Mamata Jenamani
